

ASX & Media Release

ASX Code – AZM

20th July 2016

www.azumahresources.com.au

Investment Highlights:

Wa Gold Project:

- Feasibility Study Completed
- 2.0Moz Mineral Resource including 1.3Moz Measured & Indicated
- 624,000oz Ore Reserves at 2.14 g/t
- Initial 7yr mine-life at +/- 90,000oz pa
- Excellent Infrastructure (grid power, water, established roads, airport)
- Mining Leases granted
- Exploration licenses of 2,400km² with >150km strike of prospective Birimian terrain.
- 19.99% strategic investment in neighbour, Castle Minerals Limited (~10,000km²)
- Board and management team of successful explorers, mining and corporate professionals

Issued Capital:

559.82M ordinary shares
(subject to finalisation of SPP and Placement shares issues)
5.875M performance rights
2.0M \$1.00 Converting Notes

Directors & Management:

Chairman:
Michael Atkins

Managing Director:
Stephen Stone

Non-Executive Directors:
Geoff M Jones
Bill LeClair

Company Secretary:
Dennis Wilkins

Overwhelming Demand For Share Purchase Plan and Placements Boosts Working Capital by \$4.65M

Ghana focused gold explorer and developer Azumah Resources Limited (ASX:AZM) ("Azumah" or "the Company") is pleased to advise that overwhelming demand has seen it boost working capital by a total of \$4.65 million (before costs) through a heavily oversubscribed Share Purchase Plan (SPP) that raised \$3.15 million and Share Placements that raised an additional \$1.50 million.

"The strong support shown by Azumah's existing shareholders and new investors is extremely pleasing, provides the Company with a healthy working capital position and the ability to accelerate exploration campaigns at several compelling targets within its Wa Gold Project, Ghana (Project)" Azumah Managing Director, Stephen Stone, said.

SPP

Under the SPP, which was announced on 20th June 2016 and closed on 15th July 2016, the Company received applications for a total of \$3.146 million (71,506,478) new Shares at an issue price of \$0.044 each) from Eligible Shareholders and has elected to accept all shareholder subscriptions.

Each Eligible Shareholder was entitled to subscribe for a minimum of \$500 and up to \$15,000 of new fully paid ordinary shares (Shares) at an issue price of \$0.044 per Share without incurring brokerage or other transaction costs.

The issue price represented a 20% discount to the volume weighted average price over the last five days of trade prior to the Company's trading halt on 16th June 2016.

The SPP has greatly exceeded the targeted amount that was underwritten to the amount of \$1,200,000 by Patersons Securities Limited which was also appointed Lead Manager of the SPP and the Placements.

Placement

On 20th June 2016 Azumah advised that it has received binding commitments for a total of \$800,000 (18,181,819 new shares) to sophisticated and professional investors using the placement capacity available under ASX Listing Rule 7.1 and 7.1A.

Subsequent interest in the Placement has seen this sum increased to \$1,000,000 (22,727,273 new shares).

The new shares will be issued on the same terms as, and will rank equally in all respects, with the existing fully paid ordinary shares in the Company.

Of the Placement Shares issued, 13,195,482 shares have been issued in accordance with the provisions of ASX Listing Rule 7.1A (additional 10% placement capacity) and otherwise in accordance with the approval obtained at Azumah's AGM on 26th November 2015.

Top-Up Placement

The Company has also agreed to raise an additional \$500,000 (11,363,637 new shares) through a Top-Up Placement to sub-underwriters (as set out in the SPP Booklet) who received no shortfall and who elected to participate in a Top-Up Placement at the same price.

The Top-Up Placement shares will be issued in accordance with the approval obtained at Azumah's AGM on 26th November 2015.

Directors' Participation

All eligible Azumah directors participated in the SPP.

Issue of Shares

The Company anticipates that the issue of the SPP shares and the Top-Up Placement shares will take place today with quotation and dispatch of holding statements expected to occur two days later.

All references to Mineral Resources and Ore Reserves pertain to ASX releases dated 2nd September 2014, and 23rd March 2015 respectively. Also refer to Tables 1 and 2 herein.

The Company confirms that all material assumptions underpinning the production targets and forecast information continue to apply and have not materially changed other than a positive material reduction in capital costs (refer ASX release dated 9th May 2016).

About Azumah

Azumah Resources Limited is a Perth-based, ASX-listed (ASX: AZM) company focused on exploring and developing its regional scale Wa Gold Project in the Upper West Region of Ghana, West Africa.

Three main deposits have been discovered and extensively drilled at Kunche and Bepkong, adjacent to the Black Volta River and Ghana's border with Burkina Faso, and at Julie ~80km to the east. Several satellite deposits, including Aduane and Collette, have also been delineated.

To date the Company has defined a JORC 2012 Mineral Resource of 2.0Moz of gold grading 1.5g/t Au including 1.3Moz Measured and Indicated grading 1.6g/t gold with these evenly distributed between Kunche-Bepkong and Wa East (Julie)(Table 2).

*The Julie West licence, acquired from Castle Minerals Limited (ASX:CDT)(refer AZM ASX release dated 27th April 2016) hosts the Julie West and Danyuwu prospects. The Castle resource estimates for Julie West (52,100oz Au Indicated. 4,100oz Au Inferred - completed by Runge Limited -- refer ASX:CDT release dated 14th April 2009) and for Danyawu (12,800oz Au Inferred - completed by RungePinockMinarco Limited - refer ASX:CDT release dated 7th March 2013) are JORC 2004 compliant. Azumah will re-estimate resources to JORC 2012 compliance**

Mineral Resources have grown progressively through systematic exploration of the Company's 2,400km² licence holdings which encompass large tracts of prospective Birimian terrain, the rocks that host the majority of West Africa's gold mines. Azumah anticipates Mineral Resources will continue to grow through the systematic testing of its pipeline of specific targets, prospects and many areas of interest.

Azumah has completed a Feasibility Study for a mining operation based on an initial seven-year life and producing ~90,000oz Au per year from the open pit mining and treatment of ore through a nominal 1.2 million tonnes per year carbon-in-leach (CIL) processing plant (1.8Mtpa treating softer oxide material). The plant will be located adjacent to the Kunche deposit and incorporate a flotation and regrind circuit to treat Julie primary and some transitional ore which will be hauled by road to the processing plant.

A JORC 2012 Ore Reserve of 624,000oz Au (9.1Mt at 2.14g/t Au) has been defined based on recent studies. The designed optimised pits also contain Inferred Resources of 28,000oz Au. Extensive metallurgical test work has been undertaken to confirm a high average overall gold recovery of ~92% for the Kunche, Bepkong and Julie deposits (Table 1).

Azumah has had two 15-year Mining Leases granted over its key deposits (Ghana government holds a 10% free carried interest in their 'rights and obligations' and is also entitled to a 5% gross gold royalty) and is now moving to obtain environmental operating permits necessary to allow development to proceed.

No technical, social or environmental impediments to development have been identified and there is strong support from stakeholders for the Project. Whilst the region has no other major industry, the Project benefits from excellent regional infrastructure including grid power to site, good quality bituminised and non-bituminised roads, good access to water, a sealed airstrip at the regional centre of Wa and good general communications.

Azumah holds a 19.99% interest in its neighbour and junior Ghana explorer, Castle Minerals NL which has ~10,000km² of licences adjacent to Azumah. Azumah has also assumed management responsibility for Castle.

* The reported historical estimates are not reported in accordance with the current JORC Code. A competent person had not done sufficient work to classify the historical estimates as mineral resources in accordance with the current JORC Code and it is uncertain that following evaluation and/or further evaluation work that the historical estimates will be reported as mineral resources in accordance with the JORC Code. However, having reviewed the information upon which the historical estimates have been made Azumah has formed the view that the estimates are reliable and representative of the resources it expects to be reported under the JORC Code when Azumah completes work to bring the deposits into compliance.

Wa Gold Project – Licences, Key Deposits and Prospects (Refer also to Tables 1 and 2)

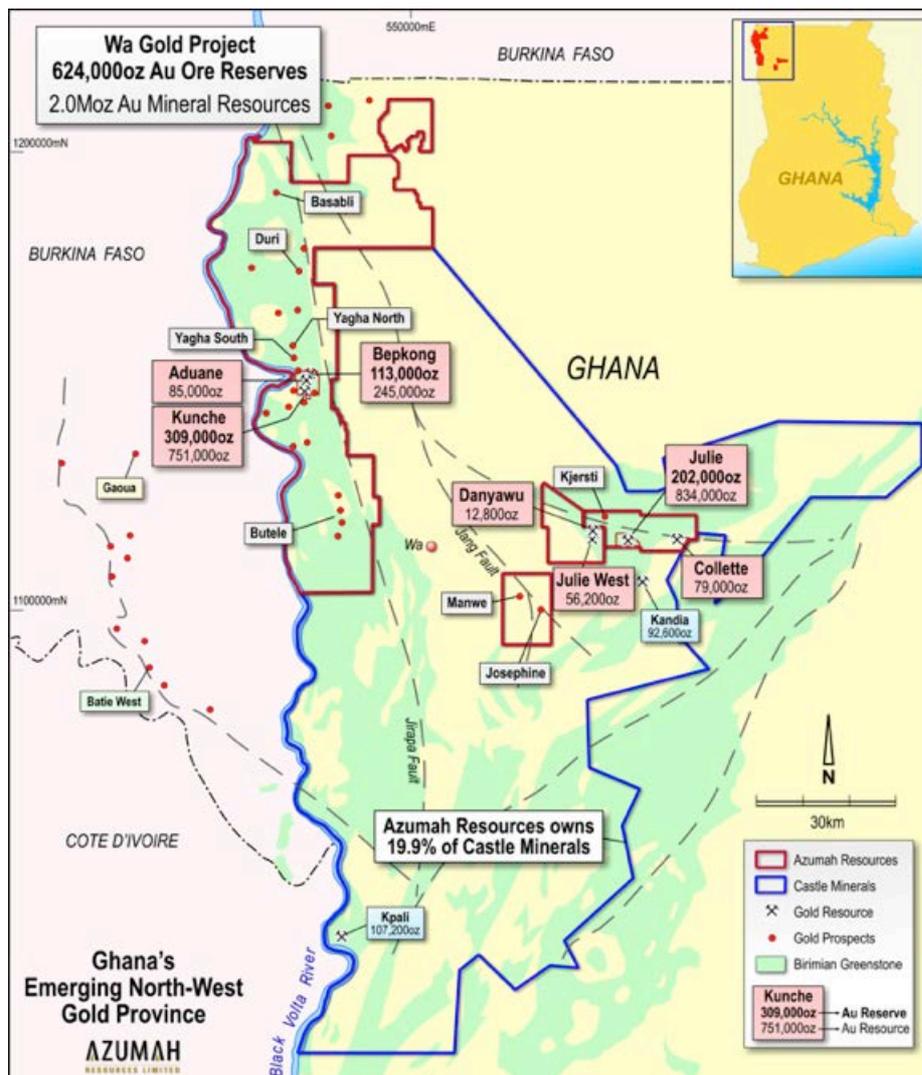

Table 1: Ore Reserves Summary - August 2014

Ore Reserves Summary							
(As at August 2014)	Proved		Probable		Total		Gold To Mill
	Tonnes (Mt)	Grade g/t Au	Tonnes (Mt)	Grade g/t Au	Tonnes (Mt)	Grade g/t Au	Oz Au
Kunche	4.91	1.92	0.05	3.11	4.97	1.94	309,000
Bepkong	1.79	1.84	0.11	1.97	1.90	1.85	113,000
Julie	0.29	2.45	1.93	2.89	2.21	2.84	202,000
Total	7.00	1.92	2.09	2.85	9.08	2.14	624,000

Values have been rounded.

Competent Persons' Statements

The scientific and technical information in this report that relates to the geology of the deposits and exploration results is based on information compiled by **Mr Stephen Stone**, who is a full-time employee (Managing Director) of Azumah Resources Ltd. Mr Stone is a Member of the Australian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Stone is the Qualified Person overseeing Azumah's exploration projects and has reviewed and approved the disclosure of all scientific or technical information contained in this announcement that relates to the geology of the deposits and exploration results.

Statements of Competent Persons for the various Mineral Resource Estimates, Ore Reserve Estimates and Process Metallurgy can all be found on the Company's website at http://www.azumahresource.com.au/projects-competent_persons.php

Forward-Looking Statement

All statements other than statements of historical fact included on this website including, without limitation, statements regarding future plans and objectives of Azumah, are forward-looking statements. Forward-looking statements can be identified by words such as 'anticipate', 'believe', 'could', 'estimate', 'expect', 'future', 'intend', 'may', 'opportunity', 'plan', 'potential', 'project', 'seek', 'will' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that are expected to take place. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management of Azumah that could cause Azumah's actual results to differ materially from the results expressed or anticipated in these statements.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained on this website will actually occur and investors are cautioned not to place any reliance on these forward-looking statements.
