Investment Highlights:

- 754,300 JORC Code compliant Mineral Resource inventory at Wa-Lawra Gold Project
- 516,000oz and 212,000oz Indicated and Inferred Mineral Resources at Kunche and Bepkong prospects
- 100%, 2,800km² licences hosting over 110km of prospective Birimian greenstone belt
- Sale & Purchase Agreement to purchase nearby Wa Project
- Pipeline of drill-ready targets
- Management team of successful explorers

Issued Capital:

102.20M ord shares: 13.25M unlisted options

Directors & Management:

AZUMAH PROCEEDS WITH WA PROJECT PURCHASE

Drilling underway at Wa Lawra and Wa Projects

Azumah Resources Ltd (ASX: AZM) is pleased to announce that it will proceed with the acquisition of a 100% interest in the Wa Project from present owner, Crew Gold Corporation (Crew).

'The acquisition of the Wa Project, combined with the recent well-supported placement to raise \$5.25 million, enables Azumah to substantially scale-up and accelerate its operations that are entirely directed at delineating sufficient gold mineralisation to underpin the first commercial scale mining operation in the emerging north-west Ghana gold province' commented Azumah Executive Chairman, Stephen Stone.

The Wa Project, 75km east of Azumah's Wa-Lawra Gold Project, includes several advanced stage, drill-confirmed prospects and a range of other quality targets. These offer strong potential for shallow gold resources to be delineated to complement the **754,000 ounce gold Inferred and Indicated mineral resource** that Azumah has already delineated, and aims to continue to grow, at its 100% owned Wa Lawra Gold Project (Table 1, Figure 1).

Azumah will issue to TSX and Oslo listed Crew an initial 6,000,000 new ordinary, fully paid Azumah shares once a 100% interest in the three prospecting licences comprising the Wa Project have been assigned to Azumah by the Ghana Minerals Commission (refer ASX announcement 3rd March 2009).

Drilling Underway

At the **Wa-Lawra Gold Project**, a 2,000m reverse circulation (RC) drilling programme at its **Bepkong prospect** will test for possible extensions to shallow, oxide gold intersections recently obtained within its main zone of mineralisation (refer ASX announcement 6th April 2009). Drilling will also infill and test for possible southern strike extensions to the Bepkong mineral resource.

Along strike from the defined mineral resources of the Kunche-Bepkong area, several highly ranked new targets defined by strong surface geochemical gold anomalism (>200ppb gold) and wide-spaced Rotary Air Blast (RAB) drilling intersections of up to 4m at 1.3g/t gold, will also be drilled.

At the new **Wa Project**, results are expected in mid-June from a 1,300m RC programme that drill tested the western zone of the 6km long **Julie prospect**. Previous wide-spaced drill traverses (>100m spacing) returned intersections of up to 6m at 7.00g/t gold from 20m, 7m at 5.93g/t gold from 13m and 4m at 5.92g/t gold from 11m.

Drilling also tested for eastern extensions of the Julie prospect to follow-up intersections obtained by Azumah during its due diligence evaluation that included 11m at 4.71g/t gold from 12m and 10m at 3.39g/t gold from 34m (refer ASX announcement 6th April 2009).

At the **Collette prospect**, located 7km east of the Julie prospect, drilling followed-up intersections including 14m at 3.53g/t gold from 21m and 11m at 4.37g/t gold from 39m and also areas of rock chip sampling where results of up to 15.2g/t gold were obtained by Azumah.

Capital Raising

Azumah recently announced a strongly supported, two-stage placement of new shares to Australia and overseas based institutional and sophisticated investors to raise \$5.25 million. The second stage of the issue is subject to the approval of shareholders at a General Meeting to be held on 3rd July 2009 (refer ASX announcement 19th May 2009).

The information in this report that relates to in-situ Mineral Resource estimates is based on information compiled by Mr David Williams, an employee of CSA Global Pty Ltd, geological consultants. Mr Williams is the competent person for the Bepkong, Yagha and Atikpi estimates and takes overall responsibility for these. Mr Williams is a Member of The Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Williams consents to the inclusion in the report of the matters based on information in the form and context in which it appears.

The information in this report that relates to Exploration Results is based on information compiled by Mr Bernard Aylward. Mr Aylward is the General Manager of Azumah Resources Limited. Mr Aylward is a Member of The Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Aylward consents to the inclusion in the report of the matters based on information in the form and context in which it appears.

Statements regarding plans with respect to the Company's mineral properties are forward-looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that the Company will be able to confirm the presence of additional mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

All notes pertaining to the Kunche resource estimation of September 2006 and the Bepkong, Atikpi and Yagha resource estimation of September 2008 can be found at www.azumahresources.com.au

Table 1: Wa-Lawra Gold Project - Statement of Combined Mineral Resource Estimates

Prospect	Indicated			Inferred			Total		
	Tonnes	Grade g/t Gold	Contained Ounces Gold	Tonnes	Grade g/t Gold	Contained Ounces Gold	Tonnes	Grade g/t Gold	Contained Ounces Gold
Kunche ⁽¹⁾	4,900,000	2.0	318,000	3,600,000	1.7	198,000	8,500,000	1.9	516,000
Bepkong ⁽²⁾	1,040,000	2.5	82,000	1,930,000	2.1	130,000	2,970,000	2.2	212,000
Atikpi ⁽²⁾				350,000	1.4	15,500	350,000	1.4	15,500
Yagha ⁽²⁾				270,000	1.2	10,800	270,000	1.2	10,800
Total	5,900,000	2.1	400,000	6,100,000	1.8	354,300	12,090,000	1.9	754,300

1. Kunche Mineral Resource estimation quoted for blocks with a grade greater than 1.0g/t gold. Differences may occur due to rounding errors. Refer ASX release September 2006 and details on Azumah website. Estimation completed by Resource Evaluations Pty Ltd in September 2006.
2. Bepkong, Atikpi and Yagha Mineral Resource estimations quoted for blocks with a grade of greater than 0.8 g/t gold. Differences may occur due to rounding errors. Estimation completed by CSA Global Pty Ltd in August 2008.
3. Details of the Bepkong Mineral Resource estimation appear in ASX release dated 4th September 2008.
4. Details of the Atikpi and Yagha Mineral Resource estimation appear in ASX release dated 4th September 2008.
